2022–23
MSc Blockchain Technologies
UPC, Barcelona
2018–21
Degree in Digital Interaction & Computation
Univ. de Lleida

PROFILE

Frontend developer with 5+ years of experience building scalable web applications with Angular and React. Specialised in component architecture, major version migration, UI design systems and internal library development. Passionate about code quality, performance and delivering great user experiences.

EXPERIENCE

Frontend Web Developer

Mar 2023 – Present

Circontrol S.A. · Viladecavalls

- Led full Angular migration from v12 to v20, modernising architecture while ensuring backward compatibility.
- Designed and maintained an internal npm component library (PrimeNG + Angular Material) shared across multiple products.
- Built web applications from scratch: requirements, architecture, implementation and production deployment.
- Integrated Tailwind CSS v4 into existing Angular projects.
- Collaborated with UX/UI via Figma: pixel-perfect implementation of design systems and reusable components.
- Ongoing maintenance and evolution of EV charge management platforms.

Full Stack Lead Developer

Mar 2022 – Feb 2023

Welme App · Barcelona

- Founding team member; technical lead for full stack development with React.js, PostgreSQL and AWS (EC2, S3).
- Built REST API with TypeScript following TDD methodology (Jest, Supertest).
- Integrated Solidity smart contracts and Web3 tooling into the platform.

FullStack / Web3 Developer

Sep 2021 – Mar 2022

Freelance – Zodiac Blockchain · Lleida

- Delivered end-to-end fullstack projects: analysis, UI design, development and production deployment.
- Web3 and frontend development: React.js applications, Solidity smart contracts, Wagmi and Viem integrations.

Full Stack Developer & BackOffice

Sep 2020 – Aug 2021

MPM Software S.L. · Igualada

- Developed brokerage management web applications with .NET (C#) and SQL Server.
- Set up and managed production environments on AWS and local servers.
